Radhikesh Kumar Thakur

Java Backend Developer

PROFESSIONAL SUMMARY

Adaptable Java Backend Developer adept in Spring and Hibernate, with solid experience in creating and maintaining high-quality server-side applications. Proficient in developing robust RESTful APIs, optimizing code, and ensuring security. Demonstrates capability in generative AI and quickly learning new technologies.

WORK EXPERIENCE

Prompt Personnel

SDE-Intern

November 2023 - May 2024

Job responsibilities:

- Developed backend APIs using Python, focusing on creating QRScanner-related APIs, showcasing skills in efficient backend solutions.
- Collaborated with cross-functional teams to understand project requirements, translating them into reliable backend applications and APIs.

PROJECTS

1. Electricity Bill Payment System |

Core Java | Git | Hibernate

- Developed a robust consumer and admin interface using Core Java and Hibernate for efficient bill management.
- Enabled users to sign up, view, and pay their bills securely.
- Implemented account and complaint management features for consumer and admin interactions.
- Utilized Git for version control to enhance collaborative development workflows.

2. Sweet Delight | |

SpringBoot | Java | RESTful APIs | mySQL | React |

JavaScript | CSS3 | Responsive Web Design | Git

- Designed a user-friendly online sweets & bakery store using Spring Boot, with secure RESTful APIs for managing backend functionalities.
- Implemented JWT authentication to enhance security in API transactions.
- Led a team of five, managed GitHub repositories, and coordinated development efforts to meet project deadlines.
- Enabled comprehensive order and customer management features for admin and customer interfaces.
